

BON TON - N7A3AO, design Cristina Celestino

Design Cristina Celestino The Bon Ton suspension lamps collection has been inspired by pendant earrings. As refined feminine accessories, earrings can be made from many different materials and in different shapes. These lamps are designed in simple forms and with different materials that shape them into dangling pieces of jewelry. The basic parts along the cord create mini pendant shapes. To recall the initial design, the composition is then closed at the end with a copper butterfly swirl.
